

Your Flexible Partner  
for Business Systems

## **Session Notes**

### **Preparing your reports for the 64-bit world**

Why Migrate your working reports to the new report engine?

In this session, we will cover the benefits of rrx and resql for WEB and look at Worderator and DevXpress vs ARC. We will take a quick look around the DevXPress Report designer and what migration tasks are required, also where Report Studio can replace ARWs.

*Presenter – Louisa Lewis, Support Consultant at G7 Business Solutions Ltd*

### **Configuration tips for Unit4 Business World from an application viewpoint**

Let us show you some configuration tips that will make your life easier. We will also take you through some areas to take care over and test fully on upgrade.

*Presenter – Yvonne Harris, Application Consultant at G7 Business Solutions Ltd*

### **Hints and tips for Unit4 Business World from a technical viewpoint**

This session covers the technical aspects; from server specifications and licensing through to common pitfalls and other hints and tips surrounding the Unit4 Business World platform. Also, see how G7 / QTC monitor their customer's Unit4 Business World systems and make use of the enhanced technical functionality.

*Presenter – Ian Witts / David Barrett- Senior Technology Partners at QuickThink Cloud*

### **Quick wins from the Unit4 Business World application**

Unit4 will take you through how adding or changing that small piece of functionality could add benefit to your system.

*Presenter – Ben Gibson / Peter Jacobs - Consultants at Unit4 Business Software*
